Required Text:

LeCroy, C.W., ed. (2008). Handbook of Evidence-Based Treatment Manuals for Children and Adolescents, 2nd Ed. Oxford University Press.

Other readings available through Moodle

Optional/Recommended:

American Psychiatric Association (2013). Diagnostic and statistical manual of mental disorders (5th ed.) Washington, DC: Author.

Other readings as assigned

Description: This course will introduce students to treatment planning and interventions with child and adolescent populations, exposing students to a wide variety of conceptual models, but focusing on viewing problems of childhood and adolescence systemically and behaviorally. Students will develop skills in the fundamentals of interviewing, diagnosis, case conceptualization, and treatment planning. Students will also become familiar with effective treatment strategies for the most common psychological disorders as well as important issues facing child and adolescent treatment.

Goals: Students will:

1. Demonstrate an understanding of culturally sensitive case conceptualization (CACREP 7f,7h,2c)
2. Demonstrate the ability to comprehend the material at a level of analysis and synthesis and be able to apply this reasoning to case studies.
3. Conceptualize cases and formulate treatment plans. (CACREP 5b,5c)
4. Identify their emerging theoretical orientation and learn to apply it in treatment planning. (CACREP 5b,5c)
5. Demonstrate in verbal and written form the ability to explain and defend their treatment plan using sound theoretical arguments and knowledge of empirical research. (CACREP 8e)
6. Demonstrate the ability to perform an intake/developmental history interview with parents, children and education personnel. (CACREP 5b,5c)
7. Demonstrate knowledge of common presenting problems and child/adolescent psychopathology and appropriate treatment including evidence based practice as required by Oregon state law.
8. Demonstrate understanding of ethical considerations and ability to make sound ethical decisions when working with children, adolescents and families. (CACREP 3e, 7i, 5g)
9. Demonstrate an understanding of developmental levels/developmental appropriateness in assessment and intervention with children and adolescents. (CACREP 3c, 3d).
10. Apply knowledge of diagnosis and psychopathology appropriately with children and adolescents using cultural sensitivity, understanding of normal development, and ecological evaluation. (CACREP 3c)
11. Demonstrate ability to conceptualize from a systems/ecological perspective and create treatment plans/interventions (including consultation) across settings including family, school, community, and other systems relevant to the client.
12. Demonstrate an understanding of basic special education/disability law, school environments, and mechanisms/methods for interventions in school settings.

Course Requirements:

ATTENDANCE: Class attendance is expected and required. Any missed class time will be made up by completing extra assignments designed by the instructor. Missing more than ten percent of class time may result in failure to complete the class. This would be 4.5 hours of a 45 hour class (3 credits). In case of extreme hardship and also at the discretion of the instructor, a grade of incomplete may be given for an assignment or the entire course. In such cases, the work to be submitted in order to remove the incomplete must be documented appropriately and stated deadlines met. Students are expected to be on time to class and tardiness may be seen as an absence that requires make-up work.

READINGS: Complete assigned readings on time and be prepared to ask questions, discuss material and apply the material during in-class assigned work.

TREATMENT PLANS: Students will be required to turn in two complete treatment plans from case examples during in-class work group assignments. A format will be provided by the instructor.

PARENT(S) AND CHILD INTERVIEW: You will conduct an intake/developmental history interview with a child and one or more parents. It will be your responsibility to find someone willing to let you practice on them. You will be provided with an informed consent form that explains that you are a student in training.

You must videotape the interview with the child. You will choose a 10-minute segment of the video to show in class or to the instructor. Students will work in small groups to give evaluation and feedback on the interview.

You will turn in a formal written report.

TESTS: Midterm and Final, Take Home, one week to complete. Tests will consist of a number of short answer/essay questions where you will be expected to demonstrate understanding of the readings, with an emphasis on synthesis and analysis. There will be one or more case examples which will require a diagnosis and treatment plan.

<u>Grading:</u>	<u>Points</u>
Treatment Plans	40 (2 @ 20 points each—10 pts for conceptualization, 10 pts for treatment plan)
Take Home Tests	40 (2 @ 20 points each)
Interview	20 (10 points for video/10 points for written summary)

A = 90-100 points/%

B = 80-89 points/%

C = < 80 points/%
