International Affairs

CHAIR: ANDREW P. CORTELL

International affairs encompasses political, military, economic, legal, and cultural relations involving states, nations, international and nongovernmental organizations, and transnational groups. Study in this discipline explores how international actors, the international system, and states' domestic environments individually and collectively affect the prospects for conflict and cooperation. Academic work focuses in particular on foreign policy, national security, international law, international economic relations, and national political and economic development.

Often, this field of study is contained within a political science department. Lewis & Clark's freestanding Department of International Affairs provides an opportunity to study the multiple dimensions of international relations in greater conceptual and empirical depth and breadth. It also allows students to integrate courses and insights from other disciplines into the major.

The department offers a rigorous and challenging conceptually oriented curriculum, introducing students to core ideas in the study of international relations and the tools and methods of the social sciences and other disciplines. Students gain the analytical and methodological skills necessary to make informed judgments about the sources, significance, and consequences of the diverse developments, as well as a solid empirical grounding in the field.

The department sponsors several extracurricular activities for students interested in international relations. The annual International Affairs Symposium, a three-day event organized by students, hosts academic and policy experts who debate aspects of a chosen topic in the field. Majors also participate in an active Model United Nations. The Meridian, a student-run journal, offers students a forum in which to publish their own essays and photographs related to international affairs.

THE MAJOR PROGRAM

Majors in international affairs are required to take seven core courses as well as an elective in each of four concentrations. Each student works with an advisor to construct a program appropriate to his/her intellectual interests and career goals.

Introduction to International Relations (International Affairs 100) should be taken early in the student's academic career. This course provides an overview of the central concepts used in understanding international relations

and is a prerequisite for most of the courses in the department. Students are advised to complete Principles of Economics (Economics 100), Introduction to Comparative Politics (Political Science 102) or American Government (Political Science 103), International Organization (International Affairs 211), and United States Foreign Policy (International Affairs 212) ideally by the end of their second year. These courses introduce students to important concepts and empirical information that inform upper-level courses. Normally, Research Methods and the three other concentration classes should be completed in the third year. International Relations Theories (International Affairs 310) usually should be taken in the semester preceding the one in which the student takes International Affairs Seminar (International Affairs 430). Students are urged to complete all other departmental requirements prior to enrolling in the seminar.

In addition to the course requirements, majors are encouraged to develop an academic program that enables them to study at least one foreign language beyond the 201 level, participate in an off-campus program, and take courses in other disciplines appropriate to individual intellectual interests and career goals. Majors also are encouraged to couple their coursework with practical learning that includes, for example, internships in Portland and elsewhere with government and nongovernmental organizations. These opportunities may be pursued during the academic year and/or the summer months.

The major's diverse course offerings and opportunities create many career paths. Some majors decide to pursue further academic study and enter graduate and professional programs. Others find employment in public service, journalism, education, business, humanitarian work, international organizations, and local and national government.

The international affairs curriculum is organized into the following core courses and concentrations. See appropriate department listings for course descriptions.

MAJOR REQUIREMENTS

A minimum of 44 semester credits (11 courses), distributed as follows:

- International Affairs 100, 211, 212, 310, and 430.
- Economics 100.
- Political Science 102 or 103.
- One elective course from each of the departmental concentrations: research methods, comparative and regional perspectives, international systems and processes, and economic perspectives.

HONORS

The honors program is based on the thesis. All international affairs majors who have a GPA of 3.5 or higher, both in the major and overall, are eligible. Students whose theses are judged by department faculty as of superior quality, originality, and insight will receive the award of honors on graduation.

RESOURCES FOR NONMAJORS

An understanding of international affairs is important to each student's growth as an individual and as a citizen of an increasingly interdependent world. A number of courses in the department are accessible to nonmajors without prerequisites. Introduction to International Relations (International Affairs 100) gives the best general introduction to the field as a whole. Nonmajors are welcome to participate in the department's extracurricular activities.

Taught: Annually, 4 semester credits.

IA 341 ADVANCED INDUSTRIAL ECONOMIES

Cortell

Content: The elements and conditions that affect whether and how countries promote their industries and economies. Emphasis on the role of globalization and how political forces influence the national economic strategies adopted in the countries studied.

Prerequisite and/or restriction: International Affairs 100. Economics 100.

International Affairs 340 recommended (but not required).

Taught: Every fourth year, 4 semester credits.

IA 342 Perception and International Relations

Mandel

Content: Processes and patterns of intergroup and international perception, views of enemies, perception in foreign policy-making and deterrence, ways of reducing perceptual distortions. Students analyze and theorize about the role of misperception—distortions in one state's perception of other states—in international relations.

Prerequisite and/or restriction: International Affairs 100.

Taught: Every fourth year, 4 semester credits.

IA 430 International Affairs Seminar

Cortell, Smith

Content: Advanced research in international affairs. Students are expected to develop, research, write, and present a methodologically rigorous and analytically oriented analysis of some dimension of international relations. Topics and explanations are to be informed and guided by the relevant international relations literature. Normally taken during spring semester of senior year.

Prerequisite and/or restriction: International Affairs 310. One course from the Research Methods list.

Taught: Annually, 4 semester credits.

IA 444 PRACTICUM

Staff

Content: Field learning experience combining theoretical concepts and skills learned in the classroom with practical work in on-campus and off-campus organizations such as the World Trade Center, World Affairs Council, or U.S. Department of Commerce in Portland. Students must be well prepared prior to enrollment, consult the faculty supervisor about the program in advance, and write a report on the practicum experience.

Prerequisite and/or restriction: Junior standing. Consent of instructor.

Taught: Annually, 2-4 semester credits.

IA 499 INDEPENDENT STUDY

Staff

Content: Same as International Affairs 299 but requiring more advanced work.

Prerequisite and/or restriction: Junior standing. Consent of instructor.

Taught: Annually, 1-4 semester credits.
