#### **COURSE SYLLABUS COVER SHEET**

Lewis & Clark College Graduate School of Education and Counseling

Course Name	CPSY 530 – Section 1
Course Number	Research Methods & Statistics I
Term	Fall 2010
Department	Counseling Psychology
Textbooks/Materials	See attached
Faculty Name	Carol Doyle
Faculty Phone/E-mail	cdoyle@lclark.edu
Faculty Office	Rogers Hall 317

#### **Catalogue Description** (copy from current catalogue):

Introduction to research methods with an emphasis on design, sampling, measurement issues, and introductory data analysis. Topics include (1) Research design: elements of the research process, types of designs, program evaluation. (2) Ethical considerations of research: informed consent, research with diverse and vulnerable populations, research with children, human subjects review. (3) Basic measurement concepts: validity, reliability, norms, score interpretation. (4) Basic statistical concepts: frequency distributions, central tendency, measures of variability, correlation. Reviews Web-based resources for conducting research.

#### **Course Description:**

This course covers the essential concepts related to research design and methodology that practitioners need to become critical evaluators of research and prepare for conducting research in their practices. Focus is on understanding each component of the research process, qualitative and quantitative designs, program evaluation, measurement issues, and data analysis,

### **Course Goals and Objectives:**

The primary goal of this class is to have students gain a more complete understanding of the research process which would allow them to critically analyze published research and/or be able to conduct independent research. Included in this understanding are models of program evaluation and the use of research findings for program modification. The secondary goal is for students to gain an introductory understanding of measurement issues in research and assessment.

The objectives of this class will be to provide opportunities to learn and apply the skills necessary for evaluating research, including analyzing published instruments, and conducting independent research, including needs assessments and program evaluation. Emphasis will be on the following components of the research process: research questions and hypotheses, research design including qualitative research, action research and program evaluation, operationalization of variables, and measurement issues. The impact of culture on research design and analysis will additionally be addressed.

By the end of the semester students will be able to:

- Identify various paradigms for conducting research (NASP 2.1, CC: 8b)
- Identify each of the steps involved in the development of a research project (NASP 2.9; CC: 8b, 8c, 8d)
- Write research questions and hypotheses (CC: 8b)
- Understand the ethical issues involved in working with human participants (CC: 8f)
- Identify and describe various types of quantitative research designs (CC: 8b)
- Identify and describe various types of qualitative research designs (CC: 8b)
- Identify the components and models of program evaluations, including needs assessments (NASP 2.9; CC: 8d, B3)
- Identify and describe validity issues inherent in different types of designs (CC: 8b, 8c, 8d)

- Discuss the use of research findings for program change (Cc: 8d, B3)
- Discuss the issues involved in conducting real world research (CC: 8a, 8e)
- Discuss the impact of culture on various aspects of the research process (CC: 8f, 7f, 2c)
- Critically evaluate published research articles (NASP 2.1; CC: 8a, 8b, 8d, 8e)
- Design a proposal for research project (NASP 2.11; CC: 8a, 8b, 8e)
- Write an Introduction to a research plan (thesis students only)

Additionally, the course will cover the objectives and competencies from your professional organizations. These include:

#### From the NASP standards,

Students will:

- Have knowledge of research, statistics and evaluation methods
- Be able to evaluate research,
- Be able to translate research into practice
- Understand research design and statistics in sufficient depth to plan and conduct investigations and program evaluations for improvement of services
- Have knowledge of varied models and methods of assessment that yield information useful in identifying strengths and needs in understanding problems and in measuring progress and accomplishments
- Have knowledge of information sources and technology relevant to their work
- Access, evaluate, and utilize information sources and technology in ways that safeguard or enhance the quality of services

# From the Marriage & Family Therapy Core Competencies & MCFT program standards Students:

- Understand research and program evaluation methodologies, both quantitative and qualitative, relevant to MFT and mental health services.
- Demonstrate an understanding of process and outcome, research design, methodology, basic statistics, with research knowledge in individual and family counseling
- Understand the legal, ethical, and contextual issues involved in the conduct of clinical research and program evaluation.
- Recognize informal research processes involved in therapy, own biases relative to research
- Know the extant MFT literature, research, and evidence-based practice.
- Read current MFT and other professional literature and use the literature to inform clinical practice.
- Critique professional research and assess the quality of research studies and program evaluation in the literature.
- Determine the effectiveness of clinical practice and techniques.
- Utilize research and technology applications in marital, couple, and family counseling
- Recognize opportunities for therapists and clients to participate in clinical research when appropriate

#### From the CACREP Standards

- The importance of research and opportunities and difficulties in conducting research in the counseling profession,
- Research methods such as qualitative, quantitative, single-case designs, action research, and outcome-based research,
- Use of technology and statistical methods in conducting research and program evaluation,
- Principles, models, and applications of needs assessment, program evaluation, and use of findings to effect program modifications
- Use of research to improve counseling effectiveness
- Legal and ethical issues in conducting research

Course Calendar: See attached

**Course Requirements: See attached** 

The graded requirements of the course differ dependent on whether you are an M.S. student in the School Psychology program, an M.A. student in the MFT or other program not planning to complete a thesis, or a student working toward admission to the M.S. and planning to complete a thesis. Overall, the requirements of the course include, weekly homework and/or in class assignments, quizzes, the development of a research article critique manual, a journal of questions from the reading, a research methods glossary, a group research project and/or introduction to a research plan, a critique of a research article.

**Attendance requirements**: Attendance requirements in the Counseling Psychology department are that a student who misses more than one classes may fail the course and that missing more than 3 courses results in an automatic failure. However, given the recommendations regarding the H1N1 virus these requirements will be modified accordingly.

**Late papers and assignments:** Any assignments turned in late (without previous permission) will automatically receive a 10% reduction in grade.

#### **Evaluation and Assessment:**

Each assignment will be graded via a point system. Generally speaking, the following grades can be associated with the points for each assignment

90% of points possible - A
80% of points possible - B
70% of points possible - C
60% of points possible - D
less than 60% of points possible - F

Additionally, if the requirements for an assignment are met, the points given will be associated with a  $B^+$ . If one exceeds the requirements of the assignment there point total will improve accordingly, Similarly, if the assignment does not meet the requirements point total will decrease accordingly. The points associated with each assignment are attached.

**Authorization Levels:** All levels

# CPSY 530 - Section 1 Research Methods & Statistics I

Fall Semester 2010 Wednesdays 5:30 - 8:45

Carol Doyle, Ph.D.

Office: Rogers Hall 317 Advising Hours: Tuesday 4-5:30 & TBA

Phone: 768-6067

E-mail: cdoyle@lclark.edu

"Research is always carried out by an individual with a life and a lifeworld ..., a personality, a social context, and various personal and practical challenges and conflicts, all of which affect the research, from the choice of a research question or topic, through the method used, to the reporting of the project's outcome. Most research textbooks do not bring the living reality of you, the researcher, into the discussion of research. We believe that the person is always at the center of the process in inquiry – that you will always be at the center of your own research, which in turn will always be a part of you" (Bentz, V. M. & Shapiro, J. J. (1998). Mindful Inquiry in Social Research, p 4.)

#### **Course Description**

Introduction to research methods with an emphasis on design, sampling, measurement issues, and introductory data analysis. Topics include (1) Research design: elements of the research process, types of designs, program evaluation. (2) Ethical considerations of research: informed consent, research with diverse and vulnerable populations, research with children, human subjects review. (3) Basic measurement concepts: validity, reliability, norms, score interpretation. (4) Basic statistical concepts: frequency distributions, central tendency, measures of variability, correlation. Reviews Web-based resources for conducting research.

#### **Requirements:**

The graded requirements of the course differ dependent on whether you are an M.S. student in the School Psychology program, an M.A. student in the MFT or other program not planning to complete a thesis, or a student working toward admission to the M.S. and planning to complete a thesis. Overall, the requirements of the course include, weekly homework and/or in class assignments, quizzes, the development of a research article critique manual, a journal of questions from the reading, a research methods glossary, a group research project and/or introduction to a research plan, and summaries and critiques of a research articles.

School Psychology, MFT, & No	on-thesis Students	<u>Thesis Students</u>	
Class Participation	60 points	Class Participation	60 points
Homework/Assignments	150 points	Homework/Assignments	150 points
Article Summaries	60 points	Article Summaries	60 points
Quizzes/Discussions	80 points	Quizzes/Discussions	80 points
Glossaries	75 points	Glossaries	75 points
Critique Questions	75 points	Critique Questions	75 points
Group Project	120 points	Lit Review/Presentation	100(20) points
Final	80 points	Final	80 points

Final grades will be based on a 700 point total and will be distributed as follows:

630 & above	A
560 - 629	В
490 - 559	C
420 - 489	D

**Late papers and assignments:** Any assignments turned in late (without previous permission) will automatically receive a 10% reduction in grade.

Cone, J.D. & Foster, S.L. (1993). *Dissertations and theses from start to finish*. Washington, DC: American Psychological Association.

# **Tentative Schedule of Classes**

<u>Date</u>	General Topic	"Official" Topic	Readings for Class	Assign/Hmwrk I	<u>Due</u>
Sept 8	How and what shall I study?	Class overview Introduction to the Research Process Library Research Evaluating Sources	Mertens p 6	In class Assignment 1	10 pts
Sept 15	Reading/Glossary Check In  What is my point of view  What is the purpose of my research – what problem am I addressing  What is my Question/hypothesis  What type of research am I doing	Evaluating Sources  Lit Review and writing Frameworks/paradigms  Basic, applied, evaluation  Research questions  Defining variables  Overview of differences: Qualitative Quantitative and Evaluation Approaches	Mertens 1, 3  Ch 13- 432 - 446  Additionally read Blue page (In this chapter), 1st section and Chapter summary for all chapters	A 2 Evaluating sources	20 pts
Sept 22	Reading/Glossary Check In Who are my participants  Treating Participants Ethically  Overview of Qualitative Types of Qualitative Designs 5 questions What Qualitative Approach will I use	Defining populations and samples  HSRC/IRB standards  Intro to Qualitative Methods Qualitative Research Designs	Mertens 11 pp. 309 – 316 (plus boxes on 317), 327- 331,335- 347  HSRC application OHRP website  Mertens 9; 8 (225-241)	A3	20 pts

Sept 29	Reading/Glossary Check In General Methodological Guidelines Who will my participants be Qualitative Methods /Data Collection	Sampling Strategies for qualitative research observation	Mertens 8 pp. 241-253 Mertens 11 (320 – 327 & 332) Mertens 12 366-369	A 4	20 pts
Oct 6	Reading/Glossary Check In  Qualitative Methods /Data Collection	Focus groups/Interviews Ensuring Quality of Data Collection	Mertens 8 240-248, 254-255 Mertens 12 370- 378 12 379, 382- 383, 388, 389-98	A 5	20 pts
Oct 13	How will I analyze and interpret my data?  What does good qualitative research look like	Analyzing & Interpreting Qualitative Data	Mertens 13 423 – 431, 437 – 442 Mertens 8 255-265	Qualitative – Glossaries due	20 pts
Oct 20	Summary of Qualitative Evaluation	Group discussions – qualitative designs  Program Evaluation & Needs Assessment	Mertens 2	Qualitative Article summary due Qualitative Discussion	40 pts 30 pts
Oct 27	Quantitative Research  What design will I use?	Overview of Quantitative Research Outcome Research Survey Research Single Subject Research Process Research Validity Issues in	Mertens 4 – 7	A 6	20 pts
	Who will my participants be?	Sampling Participants	Mertens 11 pp. 316-320		

Nov 3	What will my "intervention" look like? What will my "outcome" look like?	Designing & Operationalizing Independent & Dependent Variables	Mertens 12 351 – 366	A 7	20 pts
	What is a "Test"	Tests and Testing Process Norms & Standardization	Reading to be Assigned		
	Am I measuring what I think?	Reliability and Validity Psychometric Issues	Mertens 12 379 – 383, 388-389, 398-401		
Nov 10	Reading Glossary Check In What do scores mean? How do I interpret my results?	Overview of Statistical Concepts: Descriptive Statistics Normal Curve Standard Scores SEM	Mertens 13 403- 408 Reading to be assigned	A 8	20 pts
Nov 17	Reading/Glossary Check In  How will I analyze my data  How will I interpret the results?	Analyzing Data Inferential Statistics	Mertens 13 408- 423	Quantitative/ glossaries due Lit review due for grp project due or Quantitative discussion	40 pts
	Lit Review/Article discussion			Quantitative article summary due	30 pts
Nov 24	Thanksgiving Break	No class			
Dec 1	Combining approaches	Mixed Methods	Mertens 10, 12 378 13 431-2	Lit review due for grp project due or	
	What other types of research might I use in my future practice	Transformational Designs PAR	Mertens 8 237-9	Quantitative discussion & Quantitative article	40 pts 30 pts
	Lit review/article discussion	Group discussion/quiz quantitative design		summary due	
Dec 8	Group Projects	Group Projects		Critique questions due	75pts
	Final Pt 1 Putting it all together			questions due	40 pts
Dec 15	Group Projects Final pt 2 (Discussion)	Group Projects Final Discussion Thesis Proposal Introduction due		Article critique due	120 pts 40 pts
