

## Human impacts on marine environments

1) Break into groups of 3-4... Spend ~ 30 minutes identifying categories and examples of human impacts on marine environments.

Some broad categories to consider:

- Pollution
- Resource use
- Habitat degradation
- Global warming
- Invasive species – Mariculture – Disease

Can you come up with others?

Think about the nature of the problem, the apparent or predicted effects, and possible solutions. Take good notes and provide website URLs when possible. These will be shared with the rest of the class.

2) Return to class at 8:40 for discussion of your findings
