**LOCAL COMMUNITY 'KAMPUNGKU' PROJECT, MALAYSIA**

---

Greetings from ECOMY.

We refer to our series of teleconferences with regards to your project idea of working and enriching the lives of some local communities living in and around protected areas in Malaysia.

The promise of sustainable solar/renewable energy for local community is not a new thing but sites where we talked about, we know very well and the communities are off the grid and in need for some assistance.

ECOMY is happy to hereby lend our support and cooperation to plan and execute this project with you.

We are proud that young people such as yourself have thought about and planned such an endeavour to support people in need and spread the joy of sharing our planet sustainably. Kudos to your university and funders.

Look forward to seeing this project take off soon.

Regards,

Andrew J Sebastian  
CEO/Co-founder  
Ecotourism & Conservation Society Malaysia (ECOMY)
